

Mofifoluwa Olawuyi.

Product designer

I design products for messy, high-stakes spaces — fintech, insurance, AI, enterprise SaaS — where the requirements are usually vague and the stakes for getting it wrong are real. My job is turning that ambiguity into something people can actually use.

I've led design teams through that whole process, from early research to shipped systems, and I care a lot about what happens after launch: does this still make sense when the product doubles in size? That's usually where I spend my energy — not just the screen in front of me, but the patterns underneath it.

WORK EXPERIENCE

Cyvi, Sweden

Nov 2023 - Sep 2025

Product Designer

At CYVI, I led the design of key platform experiences, including customer, insurer, broker, claims management, and internal administration platforms. Through user research, workflow optimization, and iterative testing, I redesigned the policy checkout journey, reducing completion time by 70% and increasing checkout conversions by 40%. My work helped streamline cyber insurance operations while making the product more accessible to non-technical users.

Vurt, Nigeria

Nov 2021 - Present

Head of Design

As Head of Design, I directed the design vision, strategy, and execution across all core products, leading a team of designers and partnering closely with product managers, engineers, and business stakeholders. I established scalable design workflows, championed user-centered decision-making, and guided product initiatives from discovery through implementation. I led the complete redesign of the platform from the ground up to support a new exchanger and user ecosystem, enabling the transition from a mobile-first experience to a scalable web platform designed for growth, operational efficiency, and long-term scalability.

Core Competencies

- Product Strategy
- User Experience Design
- Design Systems
- Information Architecture
- User Research
- Interaction Design
- Design Leadership
- Cross-functional Collaboration
- Workshop Facilitation
- Prototyping

Tools

- Figma, FigJam
- Adobe Creative Suite
- Claude Code
- Codex
- ChatGPT
- Google Analytics
- Mixpanel
- Hotjar
- Notion
- Jira

Education

Bsc. Computer Science 

Redeemer's University, Nigeria

PressOne Africa , Nigeria

Jan 2026 - Mar 2026

UX Designer

Designed the website and dashboard experiences for Juliet, an AI-powered business assistant currently handling over 1,000 customer conversations daily. Led the end-to-end UX process, translating complex AI capabilities into intuitive workflows that improved onboarding, customer support efficiency, and user satisfaction.

The result?

- 84% increase in customer onboarding completion
- 60% reduction in human-escalated tickets
- Increase in Customer-satisfaction score from 66% to 92%

Dysol , Dubai

Jan 2025 - Apr 2026

Product Designer (Contract)

Worked across multiple client projects as a product design consultant, partnering with stakeholders to define requirements, design user experiences, and deliver high-fidelity solutions. Led the redesign of the company website and directed the visual experience in collaboration with a 3D designer, creating a distinctive digital presence that aligned with the brand's positioning.

Rockfall , Dubai

Dec 2025 - Mar 2026

Product Designer (Contract)

The-Owlet , Nigeria

Nov 2023 - Aug 2024

Product Designer (Contract)

Netact Services Inc. , Canada

July 2022 - Aug 2023

Creative Designer

Additional Experience available upon request.
