Dear Kredete Team,

I am a Lagos-based Product Designer with over five years of experience working across fintech, insurance, AI, and enterprise products. I also hold a BSc in Computer Science.

What interests me most about this role is the opportunity to work on a fintech product. I have robust experience designing complex financial products and understand how important clarity, trust, and attention to detail are when people are managing their money.

At Vurt, where I currently lead design, I redesigned the platform to support a growing ecosystem of users and exchangers. At CyVi, I designed experiences across customer, insurer, broker, and claims platforms. One checkout improvement I led reduced completion time by 70% and increased conversions by 40%.

I enjoy understanding how complex systems work and turning them into products that feel simple and intuitive. I care about the entire experience - from research and early product flows to edge cases, polished interfaces, implementation, and learning from how the product performs after launch.

Kredete is building the kind of financial infrastructure I would genuinely enjoy helping shape. My portfolio is available at mofi.design.

Best,

Mofifoluwa Olawuyi
